- 2. Citations and explanations (Rule 70.7)
 - 1 This report makes reference to the following document:
 - D1: US 4 858 552 A (GLATT WERNER ET AL) 22 August 1989 (1989-08-22)
 - Document D1 is considered the closest prior art and discloses a nozzle for spraying substances, according to the preamble of claim 1.

The subject matter of the characterising part of independent claim 1 differs in that the inner tube is mounted in a receiving block which is detachably fastened to a tube that is secured in the bottom region of a basic lance element and can be removed therefrom along with the inner tube and any attachments fastened thereto, and in that a securing device, which detachably connects the nozzle to the process housing of the fluidisation granulator system, is disposed in the bottom region of the outer tube.

2.1 The subject matter of claim 1 is thus novel (PCT

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement Article 33(2)). The present invention can therefore be considered to address the problem of ensuring that the nozzle is easily accessible and is easy to assemble and disassemble. 2.2 The solution to this problem as proposed in claim 1 of the present application also involves an inventive step (PCT Article 33(3)) and is not suggested by the cited documents.
